Define Problem Statements (Customer Problem Statement Template)

Create a problem statement to understand the customer's point of view. The Customer Problem Statement template helps identify the real challenges faced by the customer and develop an effective solution. It enables the team to understand the user's needs, expectations, and pain points, leading to a better product or service.

Problem Statement

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A farmer looking for the best crop to cultivate.	Select the most suitable crop based on soil nutrients and environmental conditions.	I don't know which crop is best for my land and current weather conditions.	Crop selection depends on soil nutrients (Nitrogen, Phosphorus, Potassium), temperature, humidity, pH value, and rainfall, which are difficult to analyze manually.	Confused about choosing the right crop and worried about poor crop yield and financial loss.
