Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	Farmer who provides crop and soil details and receives recommendations.
Rectangle with numbered header	Process	Performs AI/ML processing and generates crop recommendations.
Rectangle (solid fill, no number)	Data Store	Stores crop dataset, trained ML model, and prediction results.
Labeled arrow	Data Flow	Transfers input data and prediction results between entities, processes, and data store

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.
