Project Name	OptiCrop: Smart Agricultural Production Optimization Engine
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A farmer cultivating crops.	Select the most suitable crop for the current soil and weather conditions.	I don't know which crop will provide the best yield.	Soil nutrients and weather conditions vary from season to season.	Confused and worried about crop productivity.
PS-2	A farmer using fertilizers.	Choose the correct fertilizer for healthy crop growth.	I am unsure which fertilizer is suitable.	Different crops require different nutrient levels.	Concerned about unnecessary expenses and poor crop health.

PS-3	A small-scale farmer.	Predict crop yield before cultivation.	I cannot accurately estimate production.	Weather and soil conditions greatly affect crop yield.	Uncertain about income and farming decisions.
PS-4	An agricultural officer.	Help farmers make better farming decisions.	Farmers lack data-driven recommendations.	Traditional farming methods rely mostly on experience.	Motivated to improve agricultural productivity.
